

Winstar Environmental Protection Policy

Winstar has not only strived for the highest achievements in its core business of display but has dedicated itself to environmental protection since its establishment. Our mission in our sustainable future policy is to reach the goal of “zero emissions” by 2050.

Our vision

As we commit to a sustainable future for our environment, our focus is developing a display products portfolio in high-quality, with low energy consumption, allowing us to become an environmental protection benchmark for the industry.

Our mission

- Integrate environment management systems into environmental risk control, and take account of climate change and keep focusing on zero carbon emission with green production and manufacturing.
- We are driven by our optimal efficiency of energy and resources to reduce the waste stream and increase recycling reuse.
- We are dedicated to communication and cooperation with stakeholders, followed by precautionary and cautious management of chemical substance instructions, particularly on the elimination and replacement of hazardous substances.

Our actions

- Compliance with international and local environmental protection regulations and standards.
- Concerning climate change and dedicating ourselves to reducing greenhouse Gas(GHG) to “zero emission.”
- Increasing all Winstar Group employees’awareness of environmental protection and responsibility.
- Share and diffuse related knowledge and experience with our suppliers and contractors. Cooperate with them to promote environmental protection policies.

Sincerely,

Venson Liao

President of WINSTAR Display Co., Ltd
